Deskripsi Singkat MK	The UNESA Softskills course is designed to equip students with non-technical skills that are essential for success in the workplace and everyday life. In this course, students will learn various soft skills, such as effective communication, leadership, teamwork, time management, and adaptability. Through interactive learning methods, such as group discussions, simulations, and practical exercises, students will have the opportunity to develop and apply these skills in a variety of situations, both academic and professional. In addition, this course will also discuss the importance of soft skills in building positive and productive relationships in the workplace. With a focus on self-development, the UNESA Softskills course invites students to conduct personal reflection and set goals in improving their interpersonal skills. Students will be given various tools and strategies to identify strengths and areas that need improvement, so that they can be better prepared to face the challenges of an increasingly competitive workplace. Through a comprehensive approach, this course not only aims to improve students' soft skills, but also to foster a positive attitude and self-confidence needed to contribute effectively to society.
