<b>Short Course Description</b>	The discussion of scientific methods for solving problems in the field of education, introduces the basics of scientific research (scientific approach) which is the basis for carrying out analyzes related to the application of commercial science. This course discusses qualitative and quantitative approaches and the obstacles that limit them in the context of social research in society, organizations and corporate levels. This course emphasizes aspects of research planning, forming problem models, collecting relevant data, processing collected data, testing hypotheses, up to forming scientific conclusions which were the aim of the research in the first place. Lectures are carried out using a system of case study analysis, presentations and discussions and reflections.

Score &lt; 50 Wrong answer / no answer</li> </ol> <p><b>Form of Assessment :</b> Participatory Activities</p>	Discussion Questions and Answers 6 X 50			3%
11	Examining the need for validity and reliability in research	analyzing the process validity and reliability.	<p><b>Criteria:</b></p> <ol style="list-style-type: none"> <li>1. Score &gt; 80 Able to provide correct analysis and provide conclusions</li> <li>2. Score &gt; 65 The answer is not correct</li> <li>3. Score &lt; 50 Wrong answer / no answer</li> </ol> <p><b>Form of Assessment :</b> Participatory Activities</p>	Reading literature, lectures and discussions 3 X 50			3%
12	Study data analysis	Analyzing the process of understanding and explaining the analysis process and being able to discuss research results compared to journals or scientific articles	<p><b>Criteria:</b></p> <ol style="list-style-type: none"> <li>1. Score &gt; 80 Able to provide correct analysis and provide conclusions</li> <li>2. Score &gt; 65 The answer is not correct</li> <li>3. Score &lt; 50 Wrong answer / no answer</li> </ol> <p><b>Form of Assessment :</b> Participatory Activities</p>	Reading literature, discussions and practicum 6 X 50			5%

13	Study data analysis	Analyzing the process of understanding and explaining the analysis process and being able to discuss research results compared to journals or scientific articles	<b>Criteria:</b> 1.Score > 80 Able to provide correct analysis and provide conclusions 2.Score > 65 The answer is not correct 3.Score < 50 Wrong answer / no answer  <b>Form of Assessment :</b> Participatory Activities	Reading literature, discussions and practicum 6 X 50			5%
14	Study data analysis	Analyzing the process of understanding and explaining the analysis process and being able to discuss research results compared to journals or scientific articles	<b>Criteria:</b> 1.Score > 80 Able to provide correct analysis and provide conclusions 2.Score > 65 The answer is not correct 3.Score < 50 Wrong answer / no answer  <b>Form of Assessment :</b> Participatory Activities	Reading literature, discussions and practicum 6 X 50			5%
15	Develop a research design	Designing a good composition of scientific work	<b>Criteria:</b> 1.Score > 80 Able to make research proposals well and correctly 2.A score of > 65 is less suitable for a research proposal  <b>Form of Assessment :</b> Participatory Activities	project based 3 X 50			5%
16	Able to apply methodology in research proposals		<b>Form of Assessment :</b> Project Results Assessment / Product Assessment	3 X 50			25%

#### Evaluation Percentage Recap: Project Based Learning

No	Evaluation	Percentage
1.	Participatory Activities	50%
2.	Project Results Assessment / Product Assessment	50%
		100%

#### Notes

- Learning Outcomes of Study Program Graduates (PLO - Study Program)** are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- The PLO imposed on courses** are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.
- Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- Subject Sub-PO (Sub-PO)** is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
- Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- Assessment Criteria** are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- Forms of assessment:** test and non-test.
- Forms of learning:** Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- Learning Methods:** Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- Learning materials** are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- The assessment weight** is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- TM=Face to face, PT=Structured assignments, BM=Independent study.
