1	Students are able to understand the concept of closed and open loop regulatory systems and their solution methods and applications.	1.Explain the concept of closed and open loop regulatory systems. 2.Explains examples of various problems related to closed loop and open loop regulatory systems along with their solution techniques.	Lectures and discussions 3 X 50		0%
2	Students are able to understand the use of the Laplace Transformation in regulatory systems	1. Explain the Laplace transformation, inverse Laplace transformation and differential equations. 2. Explain the properties of the Laplace transform. 3. Implement existing questions with the MATLAB program.	3 X 50		0%
3	Students are able to understand the use of the Laplace Transformation in regulatory systems	1. Explain the Laplace transformation, inverse Laplace transformation and differential equations. 2. Explain the properties of the Laplace transform. 3. Implement existing questions with the MATLAB program.	3 X 50		0%
4	Students are able to explain System Modeling and Block Diagrams	1.Explains creating mathematical models for simple systems. 2.Explain calculating and creating the transfer function of a system. 3.Explains simplifying the block diagram of a complex system. 4.Explains determining the transfer of function of a regulatory system using Mason's postulates.	3 X 50		0%

5	Students are able to explain System Modeling and Block Diagrams	1.Explains creating mathematical models for simple systems. 2.Explain calculating and creating the transfer function of a system. 3.Explains simplifying the block diagram of a complex system. 4.Explains determining the transfer of function of a regulatory system using Mason's postulates.	3 X 50		0%

Notes

- Learning Outcomes of Study Program Graduates (PLO Study Program) are the abilities possessed by each
 Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the
 level of their study program obtained through the learning process.
- The PLO imposed on courses are several learning outcomes of study program graduates (CPL-Study Program)
 which are used for the formation/development of a course consisting of aspects of attitude, general skills, special
 skills and knowledge.
- Program Objectives (PO) are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- Subject Sub-PO (Sub-PO) is a capability that is specifically described from the PO that can be measured or
 observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the
 course.
- 5. **Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- 6. **Assessment Criteria** are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are

- consistent and unbiased. Criteria can be quantitative or qualitative.
- $7. \quad \textbf{Forms of assessment:} \ \text{test and non-test.}$
- Forms of learning: Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
 Learning Methods: Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning,
- Learning Methods: Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods
- 10. Learning materials are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- 11. The assessment weight is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- 12. TM=Face to face, PT=Structured assignments, BM=Independent study.
