Program Learning Outcomes (PLO)	PLO study program which is charged to the course																					
	PLO-8	Designing, implementing and evaluating mathematics learning using IT																				
	PLO-10	Make decisions based on data/information in completing assignments that are the student's responsibility and evaluate the work that has been done																				
	PLO-13	Demonstrate pedagogical knowledge in designing, implementing and evaluating mathematics learning.																				
	Program Objectives (PO)																					
	PO - 1	Able to demonstrate a critical and innovative attitude in designing mathematics learning assessments according to the demands of the 21st century [S1]																				
	PO - 2	Able to design and evaluate IT-based mathematics learning assessment instruments for the purposes of mathematics learning (instruments for assessing learning processes and outcomes, affective domains, knowledge and skills in school mathematics learning subjects (SMP/MTs, SMA/MA, or SMK) in accordance with the Curriculum Independence according to the demands of the 21st century [KU2]																				
	PO - 3	Able to make decisions based on the results of the mathematics learning assessment design produced in accordance with the demands of the 21st century in a responsible manner [KK2]																				
	PO - 4	Able to analyze basic concepts in learning assessment (mathematics) [P2]																				
	PLO-PO Matrix

Short Course Description	This course will discuss basic concepts in mathematics learning assessment, which are used to design and evaluate IT-based mathematics learning assessment instruments for the purposes of mathematics learning (instruments for assessing learning processes and outcomes, affective domains, knowledge and skills in subject learning school mathematics (SMP/MTs, SMA/MA, or SMK) in accordance with the Independent Curriculum with a critical and innovative attitude according to the demands of the 21st century.

15	Analyze and interpret the results of measuring instrument quality tests manually and utilizing software	1.1. Analyze the test items, including: level of achievement of criteria-referenced item indicators, sensitivity index of criterion-referenced items, level of difficulty of test items, discriminating power, effectiveness of options, validity of norm-referenced items 2.2. Practicing test item analysis and determining test reliability with a computer program	<b>Criteria:</b> Participation during lectures is carried out through observing honest and independent attitudes <b>Form of Assessment :</b> Practice / Performance	Class Discussion 2 X 50		<b>Material:</b> Analysis of Test Results <b>Literature:</b> <i>Kubiszyn, Tom / I. Borich, Gary . 2007. Educational testing and measurement: classroom application and practice. New Jersey: John Wiley &amp; Sons.</i>	5%
16	UAS	Create articles from the analysis of numeracy instruments that have been developed	<b>Criteria:</b> - <b>Form of Assessment :</b> Project Results Assessment / Product Assessment	2 X 50		<b>Material:</b> - <b>Library:</b>	30%

#### Evaluation Percentage Recap: Case Study

No	Evaluation	Percentage
1.	Participatory Activities	28%
2.	Project Results Assessment / Product Assessment	32%
3.	Practice / Performance	20%
4.	Test	20%
		100%

#### Notes

- Learning Outcomes of Study Program Graduates (PLO - Study Program)** are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- The PLO imposed on courses** are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.
- Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- Subject Sub-PO (Sub-PO)** is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
- Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- Assessment Criteria** are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- Forms of assessment:** test and non-test.
- Forms of learning:** Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- Learning Methods:** Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- Learning materials** are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- The assessment weight** is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- TM=Face to face, PT=Structured assignments, BM=Independent study.
