

## Universitas Negeri Surabaya Faculty of Mathematics and Natural Sciences Bachelor of Mathematics Education Study Program

Document Code

## SEMESTER LEARNING PLAN

Courses		CODE	CODE Cours		Credit Weight			ight	SEMESTER	Compilation				
					Family					Date				
Analytical Geometry			84202	202004				-	ECTS=3.18	3	July 17, 2024			
AUTHORIZATION			SP De	SP Developer		Course Cluster Coordinator			r	Study Program Coordinator				
										Dr. Endah Budi Rahaju, M.Pd.				
Learning model	l	Case Studies												
Program Learning Outcome (PLO)		PLO study program which is charged to the course												
		Program Objectives (PO)												
		PLO-PO Matrix												
		P.O												
		PO Matrix at the end of each learning stage (Sub-PO)												
			P.O Week											
				1 2 3 4	4 5 6	6 7	8	9	10 11 1	2 13 14	15 16			
Short Course Descript	tion	Examining various geometric shapes in the coordinate plane, namely the position of points and lines on and off, the location of the intersection of cones, circles, parabolas, ellipses, hyperbolas, planes, cylinders, cones and spheres and their properties.

## Notes

- 1. Learning Outcomes of Study Program Graduates (PLO Study Program) are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- The PLO imposed on courses are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.
- 3. **Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- 4. **Subject Sub-PO (Sub-PO)** is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
- 5. **Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- 6. Assessment Criteria are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- 7. Forms of assessment: test and non-test.
- 8. Forms of learning: Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- 9. Learning Methods: Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- **10. Learning materials** are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.

- The assessment weight is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
   TM=Face to face, PT=Structured assignments, BM=Independent study.
