9	Analyzing decoders	- Describe the decoder - Assemble the decoder Create a report about the decoder	Criteria: The assessment criteria are carried out by looking at the following aspects: 1. Participation: carried out by observing student activities (weight 2) 2. UTS: carried out with assessments during the middle of the semester (weight 2) 3. UAS: carried out every semester to measure all indicators (weight 3) 4. Assignment: carried out on each indicator (weight 3) Final Student Score: Participation Score (2) x Lever Score (3) x UTS Score (2) x UAS Score (3) divided by 10 Form of Assessment : Project Results Assessment / Product	Experiments, group discussions and reflections 2 X 50	Experimentation, group discussion, and reflection	Material: decoder Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local Material: decoder Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	10%
10	Analyzing decoders	- Describe the decoder - Assemble the decoder Create a report about the decoder	Assessment Criteria: The assessment criteria are carried out by looking at the following aspects: 1. Participation: carried out by observing student activities (weight 2) 2. UTS: carried out with assessments during the middle of the semester (weight 2) 3. UAS: carried out every semester to measure all indicators (weight 3) 4. Assignment: carried out on each indicator (weight 3) Final Student Score: Participation Score (2) x Lever Score (2) x UAS Score (2) x UAS Score (2) divided by 10 Form of Assessment : Participatory Activities	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: decoder Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	1%
11	Analyzing Multiplexers and sevensegments	- Describe the multiplexer and seven segments - Assemble the multiplexer and seven segments Make a report about the multiplexer and seven segments	Form of Assessment : Project Results Assessment / Product Assessment	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: multiplexer and seven segments Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	10%
12	Analyze the properties of FLIP FLOP	- Describe the characteristics of the types of Flip Flop - Analyze the circuit	Form of Assessment : Project Results Assessment / Product Assessment	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: flip flop Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	10%
13	Analyze the properties of FLIP FLOP	- Describe the characteristics of the types of Flip Flop - Analyze the circuit	Form of Assessment : Project Results Assessment / Product Assessment	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: flip flop Reader: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	5%

14	Analyzing register circuits	- Describe the properties of register circuits. Design register application circuits	Forms of Assessment : Participatory Activities, Project Results Assessment / Product Assessment	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: Bibliography : Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	5%
15	Analyze the counter circuit	- Describe the properties of the counter circuit. Design the counter application circuit.	Form of Assessment : Project Results Assessment / Product Assessment	Experiments, group discussions and reflections 2 X 50	Experiments, group discussions and reflections 2 X 50	Material: COUNTER Bibliography: Prapanca, Aditya. 2015. Diktat on Digital Systems, UNESA Informatics Engineering. Local	5%
16	UAS		Form of Assessment : Test				25%

Evaluation Percentage Recap: Project Based Learning

No	Evaluation	Percentage
1.	Participatory Activities	8%
2.	Project Results Assessment / Product Assessment	48%
3.	Practice / Performance	3%
4.	Test	41%
		100%

Notes

- Learning Outcomes of Study Program Graduates (PLO Study Program) are the abilities possessed by each Study
 Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their
 study program obtained through the learning process.
- The PLO imposed on courses are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.
- 3. **Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- 4. **Subject Sub-PO** (Sub-PO) is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
- 5. **Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- Assessment Criteria are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- 7. Forms of assessment: test and non-test.
- 8. Forms of learning: Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- Learning Methods: Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- 10. Learning materials are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- 11. The assessment weight is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- 12. TM=Face to face, PT=Structured assignments, BM=Independent study.
