Week-	Final abilities of each learning stage (Sub-PO)	Evaluation		Help Learning, Learning methods, Student Assignments, [Estimated time]		Learning materials [References]	Assessment Weight (%)																														
		Indicator	Criteria & Form	Offline (offline)	Online (online)																																
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)																														

1	Understand and explain the basic concepts of work, power and energy.	<ol style="list-style-type: none"> 1.Explain the meaning of energy 2.Explain the types of energy and the law of conservation of energy 3.Explain the units of work, power and energy. 	Criteria: Completeness of the paper on energy problems in Indonesia	Lectures, discussions and questions and answers 2 X 50			0%
2	Understand and explain the basics of electromagnetic energy conversion	<ol style="list-style-type: none"> 1.Explain the definition and magnetic quantities 2.Explain permeability and magnetic flux 3.Explain the force on a conductor in a magnetic field 4.Explain the field strength in conductors and solenoids 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers and practice questions. 2 X 50			0%
3	Understand and explain the basics of electromagnetic energy conversion	<ol style="list-style-type: none"> 1.Explain the definition and magnetic quantities 2.Explain permeability and magnetic flux 3.Explain the force on a conductor in a magnetic field 4.Explain the field strength in conductors and solenoids 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers and practice questions. 2 X 50			0%
4	Able to understand the basic concepts of magnetic circuits	<ol style="list-style-type: none"> 1.Explain the basic concepts of electrical circuits 2.Explain magnetic force and ampere coils 3.Explain permeance, reluctance and magnetization curves 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers, practice questions. 2 X 50			0%
5	Able to understand the basic concepts of magnetic circuits	<ol style="list-style-type: none"> 1.Explain the basic concepts of electrical circuits 2.Explain magnetic force and ampere coils 3.Explain permeance, reluctance and magnetization curves 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers, practice questions. 2 X 50			0%

6	Understand, analyze and calculate electromagnetic induction	<ol style="list-style-type: none"> 1.Explain the relationship between magnetism and electricity 2.Explain the generation of electromotive force 3.Explain induced current. 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers, exercises and assignments 2 X 50			0%
7	Understand, analyze and calculate electromagnetic induction	<ol style="list-style-type: none"> 1.Explain the relationship between magnetism and electricity 2.Explain the generation of electromotive force 3.Explain induced current. 	Criteria: Full marks are obtained if you do all the questions correctly	Lectures, discussions, questions and answers, exercises and assignments 2 X 50			0%
8	Analyzing the relationship between magnetism and electricity, analyzing and calculating the generation of electromotive force, induced current and Faraday's law and Lenz's law	Grouping types of tools for converting electrical energy into mechanical energy Grouping types of tools for converting mechanical energy into electrical energy Demonstrating the working principles of tools for converting electrical energy into mechanical energy Demonstrating the working principles of tools for converting mechanical energy into electricity Calculating quantities in the conversion of electrical energy into mechanical energy Calculating quantities in the conversion of electrical energy into mechanical energy	Criteria: <ol style="list-style-type: none"> 1.Score number 1 max 36 2.No. 2's score is a maximum of 25 3.Score number 3 is a maximum of 25 4.Score number 4 max 14 	Scientific approach Problem-based learning model Method of discussion, practice, assignment and reflection 2 X 50			0%
9	able to explain the conversion of light into electricity	Grouping types of tools for converting electrical energy into mechanical energy Grouping types of tools for converting mechanical energy into electrical energy Demonstrating the working principles of tools for converting electrical energy into mechanical energy Demonstrating the working principles of tools for converting mechanical energy into electricity Calculating quantities in the conversion of electrical energy into mechanical energy Calculating quantities in the conversion of electrical energy into mechanical energy	Criteria: <ol style="list-style-type: none"> 1.Score number 1 max 36 2.No. 2's score is a maximum of 25 3.Score number 3 is a maximum of 25 4.Score number 4 max 14 Form of Assessment : Participatory Activities	Scientific approach Problem-based learning model Method of discussion, practice, assignment and reflection 2 X 50			0%

10	1.able to explain the installation of array/string solar panels 2.able to explain VI and PV curves		Form of Assessment : Participatory Activities				0%
11	1.able to explain the different characteristics of batteries 2.able to explain the characteristics of battery charging and discharging						0%
12	1.able to explain the working principle of using an inverter 2.able to install an inverter for PLTS use						0%
13	able to design ongrid PLTS						0%
14	able to design offgrid PLTS						0%
15	able to explain the principles of thermoelectricity						0%
16	able to explain thermoelectric applications						0%

Evaluation Percentage Recap: Case Study

No	Evaluation	Percentage
		0%

Notes

- 1. Learning Outcomes of Study Program Graduates (PLO - Study Program)** are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- 2. The PLO imposed on courses** are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.
- 3. Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
- 4. Subject Sub-PO (Sub-PO)** is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
- 5. Indicators for assessing** abilities in the process and student learning outcomes are specific and measurable statements that identify the abilities or performance of student learning outcomes accompanied by evidence.
- 6. Assessment Criteria** are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- 7. Forms of assessment:** test and non-test.
- 8. Forms of learning:** Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- 9. Learning Methods:** Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- 10. Learning materials** are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- 11. The assessment weight** is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- 12. TM=Face to face, PT=Structured assignments, BM=Independent study.**
