SEMESTER LEARNING PLAN

Courses	CODE	Course Family	Credit Weight	SEMESTER	Compilation Date																																																		
Engineering Design	2130203024	Compulsory Study Program Subjects	T=2 P=0 ECTS=3.18	3	February 6, 2024																																																		
AUTHORIZATION	SP Developer		Course Cluster Coordinator	Study Program Coordinator																																																			
	Andita Nataria Fitri Ganda, Arya Mahendra Sakti, Diah Wulandari, Ferly Isnomo Abdi, Dyah Riandadari, Firman Yasa Utama		Andita Nataria Fitri Ganda	Arya Mahendra Sakti, S.T., M.T.																																																			
Learning model	Project Based Learning																																																						
Program Learning Outcomes (PLO)	PLO study program which is charged to the course																																																						
	PLO-9	Able to apply knowledge of mathematics, science and/or materials, and engineering to gain a thorough understanding of engineering principles.																																																					
	Program Objectives (PO)																																																						
	PO - 1	Mastering the basic concepts of mechanical engineering in general and the basic concepts of machining engineering concentration																																																					
	PLO-PO Matrix																																																						
		<table border="1" style="margin: auto;"> <tr> <td style="padding: 5px;">P.O</td> <td colspan="4" style="padding: 5px;">PLO-9</td> </tr> <tr> <td style="padding: 5px;">PO-1</td> <td style="width: 20px;"></td> <td style="width: 20px;"></td> <td style="width: 20px;"></td> <td style="width: 20px;"></td> </tr> </table>				P.O	PLO-9				PO-1

Week-	Final abilities of each learning stage (Sub-PO)	Evaluation		Help Learning, Learning methods, Student Assignments, [Estimated time]		Learning materials [References]	Assessment Weight (%)
		Indicator	Criteria & Form	Offline (offline)	Online (online)		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1	Able to identify tool/machinery product needs.	1.Able to define design problems 2.Able to explore ideas 3.Creativity	Criteria: According to the scoring guidelines and presentation rubric, full marks are obtained if you do all the questions well and correctly Form of Assessment : Participatory Activities, Portfolio Assessment	1. Field observations. 2. Case study. 2 X 50	1. Hunting on the internet 2. Case Study 1x50	Material: Identifying community needs: Business World, Industrial World, Appropriate Technology Reference: <i>Kenneth S. Hurst, Engineering Design Principles, Erlangga Publisher, Jakarta, 2006.</i>	10%
2	Determine torque requirements for the production process	Skilled in choosing the amount of torque on production machines		Discussion of questions and answers on 3 X 50 exercises and assignments			0%
3	Calculate engine rotation according to capacity	Determine the rotation on the appropriate machine		Discussion, questions and answers, exercises and assignments 3 X 50			0%
4	Calculate engine power requirements	Determines the power on the machine		Discussion of questions and answers on 3 X 50 exercises and assignments			0%
5	Choose the motor, gearbox, pulley, belt, chain according to your needs	Skilled in selecting machine components according to needs		Discussion, questions and answers, exercises and assignments 3 X 50			0%
6	Designing transmission systems	Skilled in designing transmission systems		Discussion, questions and answers, exercises and assignments 3 X 50			0%
7	Understand material 1 to 6	Mastering material 1 to 6		Written Exam 3 X 50			0%

8	Design the placement of the main components.	Skilled in determining the placement of the main engine components		Discussion, questions and answers, exercises and assignments 3 X 50			0%
9	Calculating torque moment	Determine the torque moment on the component		Discussion, questions and answers, exercises and assignments 3 X 50			0%
10	Calculate the shaft diameter.	Skilled in calculating component shaft diameters		Discussion, questions and answers, exercises and assignments 3 X 50			0%
11	Determine the type of bearing and bolt nuts.	1. Skilled in choosing the type of bearing on the machine 2. Skilled in selecting nuts and bolts on components		Discussion, questions and answers, exercises and assignments 3 X 50			0%
12	Create an array image	Able to create machine layout drawings using software		Discussion, questions and answers, exercises and assignments 3 X 50			0%
13	Create an array image.	Able to make a drawing of the arrangement of a machine	Criteria: Compliance with the answer key	Guided practice and 3 X 50 assignments			0%
14	Create an array image.	Able to make a drawing of the arrangement of a machine	Criteria: Compliance with the answer key	Guided practice and 3 X 50 assignments			0%
15	Create an array image.	Able to make a drawing of the arrangement of a machine	Criteria: Compliance with the answer key	Guided practice and 3 X 50 assignments			0%
16			Form of Assessment : Test				30%

Evaluation Percentage Recap: Project Based Learning

No	Evaluation	Percentage
1.	Participatory Activities	5%
2.	Portfolio Assessment	5%
3.	Test	30%
		40%

Notes

- Learning Outcomes of Study Program Graduates (PLO - Study Program)** are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- The PLO imposed on courses** are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.

3. **Program Objectives (PO)** are abilities that are specifically described from the PLO assigned to a course, and are specific to the study material or learning materials for that course.
4. **Subject Sub-PO (Sub-PO)** is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of the course.
5. **Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
6. **Assessment Criteria** are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
7. **Forms of assessment:** test and non-test.
8. **Forms of learning:** Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
9. **Learning Methods:** Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
10. **Learning materials** are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
11. **The assessment weight** is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
12. TM=Face to face, PT=Structured assignments, BM=Independent study.
