1	Able to describe the mechanical and physical properties of materials	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
2	Able to identify destructive and non-destructive testing	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
3	Able to describe tensile and impact testing	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
4	Able to describe tensile and impact testing	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
5	Able to classify variations in hardness testing	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
6	Able to classify variations in hardness testing	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
7	Be able to describe the stages of metallography	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
8	USS (attached)	USS (attached)	Criteria: USS (attached)	USS (attached) 1 X 1		0%
9	Able to describe surface roughness testing and coating thickness measurements	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%

Able to classify the fubric describe rubric design and design and testing and	10	Able to describe surface roughness testing and coating thickness measurements	according to the rubric	Criteria: According to the Rubric	Lectures, discussions, questions and answers, exercises and 1 X 1 assignments		0%
radiography and magnetography testing 13 Able to carry out surface roughness and coating thickness testing procedures 14 Able to carry out surface roughness and coating thickness testing procedures 15 Able to perform Rockwell hardness testing procedures 16 Able to perform Rockwell hardness testing procedures 17 Able to perform Rockwell hardness testing procedures 18 Able to perform Rockwell hardness testing procedures 19 Able to perform Rockwell hardness testing procedures 10 Able to perform Rockwell hardness testing procedures 10 Criteria: According to the Rubric According to th	11	types of fulorescence and dye penetrant	to the	According to the	discussions, questions and answers, exercises and 1 X 1		0%
surface roughness and coating thickness testing procedures 14 Able to carry out surface roughness and coating thickness testing procedures 15 Able to perform Rockwell hardness testing procedures 16 Able to perform Rockwell hardness testing procedures 17 Able to perform Rockwell hardness testing procedures 18 Able to perform Rockwell hardness testing procedures 19 Able to perform Rockwell hardness testing procedures 19 Able to perform Rockwell hardness testing procedures 20 Criteria: 21 Able to perform Rockwell hardness testing procedures 22 According to the Rubric 23 According to the Rubric 24 According to the Rubric 25 According to the Rubric 26 According to the Rubric 26 According to the Rubric 36 According to the Rubric 37 According to the Rubric 38 According to the Rubric 49 According to the Rubric 40 According to the Rubric 41 X 1 assignments 41 X 1 assignments	12	radiography and magnetography	to the	According to the	discussions, questions and answers, exercises and 1 X 1		0%
surface roughness and coating thickness testing procedures to the rubric According to the Rubric According to the Rubric According to the Rubric Solutions and answers, exercises and 1 x 1 assignments Criteria: According to the Rubric Criteria: According to the Rubric	13	surface roughness and coating thickness testing	to the	According to the	discussions, questions and answers, exercises and 1 X 1		0%
Rockwell hardness testing procedures to the rubric Rubric discussions, questions and answers, exercises and 1 X 1 assignments	14	surface roughness and coating thickness testing	to the	According to the	discussions, questions and answers, exercises and 1 X 1		0%
16	15	Rockwell hardness	to the	According to the	discussions, questions and answers, exercises and 1 X 1		0%
	16						0%

Evaluation Percentage Recap: Case Study

No	Evaluation	Percentage
		0%

Notes

- 1. Learning Outcomes of Study Program Graduates (PLO Study Program) are the abilities possessed by each Study Program graduate which are the internalization of attitudes, mastery of knowledge and skills according to the level of their study program obtained through the learning process.
- 2. The PLO imposed on courses are several learning outcomes of study program graduates (CPL-Study Program) which are used for the formation/development of a course consisting of aspects of attitude, general skills, special skills and knowledge.

 3. Program Objectives (PO) are abilities that are specifically described from the PLO assigned to a course, and
- are specific to the study material or learning materials for that course.
- 4. Subject Sub-PO (Sub-PO) is a capability that is specifically described from the PO that can be measured or observed and is the final ability that is planned at each learning stage, and is specific to the learning material of

the course.

- 5. **Indicators for assessing** ability in the process and student learning outcomes are specific and measurable statements that identify the ability or performance of student learning outcomes accompanied by evidence.
- 6. Assessment Criteria are benchmarks used as a measure or measure of learning achievement in assessments based on predetermined indicators. Assessment criteria are guidelines for assessors so that assessments are consistent and unbiased. Criteria can be quantitative or qualitative.
- 7. Forms of assessment: test and non-test.
- 8. **Forms of learning:** Lecture, Response, Tutorial, Seminar or equivalent, Practicum, Studio Practice, Workshop Practice, Field Practice, Research, Community Service and/or other equivalent forms of learning.
- Learning Methods: Small Group Discussion, Role-Play & Simulation, Discovery Learning, Self-Directed Learning, Cooperative Learning, Collaborative Learning, Contextual Learning, Project Based Learning, and other equivalent methods.
- Learning materials are details or descriptions of study materials which can be presented in the form of several main points and sub-topics.
- 11. The assessment weight is the percentage of assessment of each sub-PO achievement whose size is proportional to the level of difficulty of achieving that sub-PO, and the total is 100%.
- 12. TM=Face to face, PT=Structured assignments, BM=Independent study.
